*Not available with squared top corners.

Modulate™ includes 14 aluminium tubular frames (Ø30 mm) that can be used with double-sided printed textile graphics.

These modules can be used by themselves or combined to create hundreds of possible configurations. Units come with rounded top edges as standard, but can be upgraded to square corners for a contemporary look.*

The different structures are classified according to their width or shape. The colour of the module corresponds to the coding system on the structure. The range also includes a counter. Connect 2 or more counters to create a large countertop.

Each frame is supplied with a Modulate™ carry bag with dedicated slots for the feet and graphics.

SCALABLE STRUCTURES

To add greater versatility to your Modulate™ structures, you can add a 400mm tubular extension, allowing you to change the height of your frame from 2000 mm to 2400 mm.

Easily inserted between two sections, this extension allows you to use the same frame at two different heights.

Units come with rounded top edges as standard, but can be upgraded to square corners for a contemporary look. *

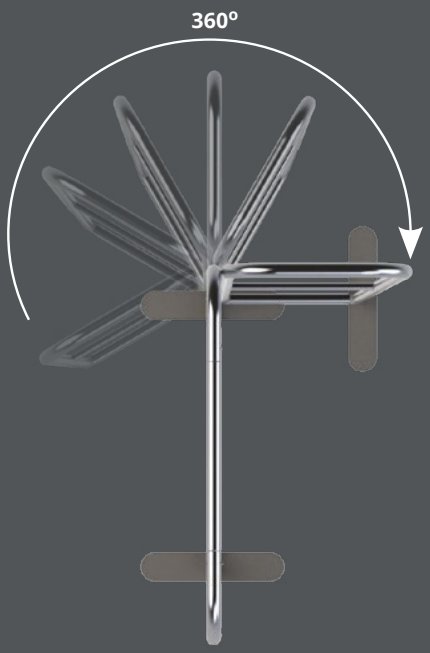
MAGLINK CONNECTORS: SIMPLE, FAST AND RECONFIGURABLE

Get creative by combining the different sizes and shapes of Modulate™ frames.

Thanks to the exclusive patented MagLink magnetic system built into the structure, you can connect the frames by simply touching them together.



Simply position the frames at your desired angle

PATENTED TECHNOLOGY

360° MagLink system. Each structure includes 4 magnets that allow you to connect the frames together without any need for tools.
